**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW EMERGENCY USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF AUSTRALIAN PLAGUE LOCUST IN NON-CROP AREAS**

PERMIT NUMBER – PER90672

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 15 MARCH 2021 TO 30 JUNE 2021

Permit Holder:

GOONDIWINDI REGIONAL COUNCIL
4 McLean Street
GOONDIWINDI QLD 4390

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

Sero-X Pesticide (APVMA No. 90672)

Containing: 400 g/L CLITORIA TERNATEA EXTRACT as the only active constituent.

RESTRAINT:

DO NOT apply if heavy rains or storms are forecast within 3 days.

DO NOT irrigate to the point of water runoff from the treatment area for at least 3 days after application.

Directions for Use:

Crop	Pest / Disease	Rate
Residential yards and gardens, parks, council recreational areas, urban open spaces, industrial land, domestic and public service areas and agricultural non-crop areas.	Australian Plague Locust (<i>Chortoicetes terminifera</i>)	20mL product / 1L spray

Critical Use Comments:

- Apply when locust nymphs are detected. The nymph growth stage is identified as young locusts which are not yet able to fly.
- Apply by foliar application to areas where locusts are detected using knapsack spray equipment.
- Use a spray volume of 100-700 mL/10m², depending on the equipment, to achieve thorough coverage of foliage.
- DO NOT apply more than 4 applications per season.
- DO NOT apply less than 5 days after the previous treatment.
- Domestic animals and livestock must be removed from areas before treatment, and must not be allowed to return to treated areas until the spray has dried

Protection of Honey Bees and Other Insect Pollinators:

DO NOT overspray flowering plants or weeds.

Integrated Pest Management:

Not compatible with integrated pest management (IPM) programs utilising beneficial arthropods.

Safety Directions:

For residential yards and garden use: Will irritate eyes. Avoid contact with eyes. When opening the container, preparing spray and using the prepared spray, wear safety glasses. If product in eyes wash it out immediately with water. Wash hands after use. After each day's use, wash safety glasses.

For all other uses: Will irritate eyes. Avoid contact with eyes. When opening the container and preparing spray, wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), elbow length chemical resistant gloves and face shield or goggles. When using the prepared spray wear cotton overalls buttoned to the neck and wrist (or equivalent clothing). If product in eyes wash it out immediately with water Wash hands after use. After each day's use, wash gloves, face shield or goggles and contaminated clothing.

Re-Entry Restrictions:

DO NOT enter treated areas, or allow domestic animals or livestock to return to treated areas, until the spray has dried.

Withholding Period:

Not required when used as directed.

Jurisdiction:

NSW and QLD only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Efficacy

The uses under this permit have not been extensively tested to assess their effectiveness. Any issues observed with the effectiveness of the uses should be reported to the permit holder.
